# Lean Improvement Programme

The world is changing quickly and organisations need to innovate to stay competitive. Participants on the Lean Improvement Programme learn, apply and evaluate critical tools and analytical skills for the identification and elimination of waste. Companies benefit from ongoing innovations that increase productivity and boost competitiveness.

- Focus on boosting performance through identifying efficiencies and cost savings
- Practical, skills- and knowledge-based training for the workplace
- Relevant to all organisations, in all sectors
- 5 x all-day monthly workshops and onsite consultancy visit by Lean Expert Practitioner
- Final presentation of findings, demonstrating implementation and tangible benefits
- Lean Green Belt certificate from the International Lean Six Sigma Institute and Lean Improvement Programme certificate from Fife College

The Lean Improvement Programme will develop the skills and confidence required to enhance quality and improve performance within your organisation through the identification and elimination of waste.

You will have the opportunity to work with others from a range of sectors thereby providing insight into how other organisations approach Continuous Improvement.

Alongside a series of workshops exploring the theory and tools within Lean, you will be tasked with identifying and undertaking a project within your workplace. You will be visited in your workplace by a Lean Expert Practitioner who will offer feedback and assess your progress.

At the end of the programme, you will present the results of your project, demonstrating measurable benefits to your organisation and customers.

On completion of your project you will receive a Lean Green Belt certificate from the International Lean Six Sigma Institute (ILSSI) in addition to a Lean Improvement Programme Certificate from Fife College.

## **What You Study**

You will create a Project Charter, engage with problem-solving tools, develop an understanding of the application of the process improvement and explore project measures and opportunities for improvement

- Focus on boosting performance through identifying efficiencies and cost savings
- Practical, skills- and knowledge-based training for the workplace
- Relevant to all organisations, in all sectors

## **Location**

Carnegie Conference Centre,  
Dunfermline

## **Duration and Attendance**

- 5 x all-day monthly workshops and onsite consultancy visit by Lean Expert Practitioner
- Final presentation of findings, demonstrating implementation and tangible benefits
- 9.30am - 4.30pm

## Entry Requirements

You must be working within an organisation and have the opportunity to undertake a continuous improvement project with the support of your management team.

## Price

£2,495

*The Lean Improvement Programme has been an excellent learning experience for our participants and very beneficial for the company.*

*Our team did a fantastic job. As well as their project delivering cost savings of around £113,000, a very important benefit for the company is the way they engaged with colleagues and have promoted a dynamic culture of continuous improvement across the production team.*

*We intend to extend this project to our other sites across Scotland and the UK.*

**- Scott Grant, Managing Director  
Manufacturing at Scott Group**
